### Sensation and Perception | SAGE Publications Inc

Sensation and perception are two separate processes that are very closely related. Sensation is input about the physical world obtained by our sensory receptors, and perception is the process by which the brain selects, organizes, and interprets these sensations. In other words, senses are the physiological basis of perception.

Visual Sensation and Perception: How do we see Seeing an object doesn't "just happen" light bounces off light enters eye and forms image on the back of the eye (i.e., on the retina) image generates chemical signal in receptors which is then converted to an electrical signal signals travel along nerve fibers (bundle of axons) to the brain ... signals are processed and you "perceive" Challenge of Vision: How do we... convert light image on the retina into neural impulses (sensation) process ...

**Visual Sensation and Perception\_ How do we see.docx ...**

D. Hume used the term "bundle" in this sense, also referring to the personal identity, in his main work: "I may venture to affirm of the rest of mankind, that they are nothing but a bundle or collection of different perceptions, which succeed each other with inconceivable rapidity, and are in a perpetual flux and movement".
