Choosing PL/SQL Collection Types. If you already have code or business logic that uses another language, you can usually translate the array and set types of that language directly to PL/SQL collection types. For example: Arrays in other languages become varrays in PL/SQL. Sets and bags in other languages become nested tables in PL/SQL.

Aggregate Functions . Aggregate functions return a single result row based on groups of rows, rather than on single rows. Aggregate functions can appear in select lists and in ORDER BY and HAVING clauses. They are commonly used with the GROUP BY clause in a SELECT statement, where Oracle Database divides the rows of a queried table or view into groups. In a query containing a GROUP BY clause ...
