It is basically a search engine for that lets you search from more than 466 billion pages on the internet for the obsolete books for free, especially for historical and academic books.

Sharks

Shark, any of numerous species of cartilaginous fishes that make up the order Selachii (class Chondrichthyes). Most species have a tough skin that is dull gray in color and roughened by toothlike scales. The mouth contains sharp triangular teeth. Sharks lack a swim bladder and must swim to keep from sinking.

shark | Attacks, Types, & Facts | Britannica

Modern sharks began to appear about 100 million years ago. Fossil mackerel shark teeth date to the Early Cretaceous. One of the most recently evolved families is the hammerhead shark (family Sphyrnidae), which emerged in the Eocene. The oldest white shark teeth date from 60 to 66 million years ago, around the time of the extinction of the dinosaurs. In early white shark evolution there are at ...

Shark Species — Shark Research Institute

Contrary to popular belief, only 34 shark species are involved in such attacks and therefore are dangerous to humans, among them, the tiger shark, the bull shark or the great white shark. The concept of sharks, as "man-eaters" lurking beneath the legs of any swimmer that goes into the ocean, remains in our minds despite the time, but it is ...

Shark Facts and Information

Humans are a greater threat to sharks than sharks are to us. Many shark species are threatened by fishing or bycatch, which lead to the deaths of millions of sharks each year. Compare that to shark attack statistics—while a shark attack is a horrifying thing, there are only about 10 fatalities worldwide each year due to sharks.

All About Sharks for Children: Animal Videos for Kids - FreeSchool

A shark's spiracle is located just behind the eyes which supplies oxygen directly to the shark's eyes and brain. Bottom dwelling sharks, like angel sharks and nurse sharks, use this extra respiratory organ to breathe while at rest on the seafloor. It is also used for respiration when the shark's mouth is used for eating.

12 Shark Facts That May Surprise You | NOAA Fisheries

Sharks have six highly refined senses for both hunting and communication: vision, taste, smell, hearing, touch and electro-reception. These finely honed senses coupled with sleek, torpedo-shaped bodies make most sharks highly skilled hunters.
