The F.T. Baker 12-bore double rifle. Shooting black powder cartridge double rifles is a splendid thing. The "express" rifles chambered in .360, .400, .450, .500 and .577 are accurate, have fairly mild recoil and even the rather plain rifles are truly works of art. The 8- and 4-bore large-bore rifles are only fun at reduced loads, as full-house charges of black powder and bullets from 875 grains to over 2,000 grains can produce frightful recoil.

Informative without the academic dryness of a "how to" manual. Author is probably the most knowledgeable and qualified to discuss the nuances of the Black Powder Cartridge, the historical arms that fire these venerable rounds, and the range techniques needed to get them to go where they are pointed.

Amazon.com: Shooting the Black Powder Cartridge Rifle ...

The shooting of black powder cartridge rifles is a great challenge and one which has very few finite rules. It involves almost continual experimentation with old and new components and equipment. For short range hunting and target practice, simple and proven reloading methods will provide suitable ammunition and accuracy.

Black Powder Pistols Generally Come Percussion-Fired. The final form of the musket/muzzleloaded gun - whether a pistol, rifle or blunderbuss - was the percussion-fired system, and most black powder pistols today are percussion-fired. To shoot, a percussion cap needs to be fitted to a nipple on the firearm.
