The 4 Percent Universe Dark

Dark energy added to dark matter reduces the familiar universe to 4 percent of the total. Panek delivers vivid sketches of scientists, lucid explanations of their work and revealing descriptions of the often stormy rivalry that led to this scientific revolution, usually a media cliché, but not in this case." —Kirkus Reviews, STARRED review

The 4-Percent Universe: Dark Matter, Dark Energy, and the ...

In recent years, a handful of scientists have been racing to explain a disturbing aspect of our universe: only 4 percent of it consists of the matter that makes up you, me, our books, and every star and planet. The rest is completely unknown. Richard Panek tells the dramatic story of how scientists reached this cosmos-shattering conclusion.

The 4-Percent Universe: Dark Matter, Dark Energy, and the ...

Dark energy, however, is a substance or force responsible for the accelerating expansion of the universe over time. The significant focus of The 4 Percent Universe is on the developments of astronomical science in the 20th century, including the formation of the expanding universe theory by Edwin Hubble in the 1930s.

The 4 Percent Universe - Wikipedia

It was 13.75 billion years old.... it was flat, consisting of 72.8 percent dark energy, 22.7 percent dark mater, and 4.56 percent baryonic matter (the stuff of us) - an exquisitely precise accounting of the depth of our ignorance.
