The idea of eternal recurrence is the logical outcome of a totally deterministic universe. If everything is caused, then, after every causal possibility has worked itself out, then the whole thing begins again, since there is no other option.

Is Nietzsche's theory of 'Eternal Recurrence' valid? - Quora

Nietzsche wrote that he thought the eternal return was his "most scientific" idea and this has mislead many people into thinking it was a thesis about the nature of the universe, a cosmological theory or something like that. I'll try to give a bit better an interpretation than that. Nietzsche is what I would call an ethical perfectionist.
